RELATED PARTY TRANSACTIONS. The Fund's target fund (PhilEquity Fund, Inc.) has holdings of Filinvest Land Inc. and East West Banking Corporation shares of stocks.

OUTLOOK AND STRATEGY. COVID-19 vaccine orders finally arrived in the country and commenced the inoculation of Filipinos beginning with medical front liners. However, our pace is still lagging regional peers and government target of one million jabs per week. On the monetary side, the Bangko Sentral ng Pilipinas (BSP) maintained its policy rate at 2% despite monthly inflation rate exceeding government's 2%-4.2% target range. On the fiscal side, Pres. Rodrigo Duterte signed the much-awaited Corporate Recovery and Tax Incentives for Enterprises Act (CREATE) Law, which reduces corporate income taxes from 30% to 25%. Despite a few tweaks on some provisions, the market views the corporate income tax cut from this law to provide an immediate boost to stock earnings this year. With the hopes of relaxed quarantine measures and a pick-up on our vaccination drive, we expect local equity prices to improve in the coming months. **PROSPECTIVE INVESTMENT.** The Fund's prospective investments, depending on availability and market development, may include but are not limited to, PhilEquity Fund, Time Deposits, Government Securities and tradable fixed income securities issued by local financial institutions or private corporations. Investment in the PhilEquity Fund may amount up to 100% of total assets but shall not fall below 90% of total assets of the Fund.

OUTLOOK AND STRATEGY. US President Joe Biden signed the USD 1.9 trillion relief bill into law, paving the way for stimulus checks and vaccination aid. On the monetary policy front, the US Fed decided to maintain its policy rate at 0.25% and highlighted that it will keep rates low through 2023. US Fed Chief Jerome Powell reiterated that they first need to see inflation rate consistently at above its 2.0% target and full employment before considering a material tweak on its bond buying program and policy rate hike. In addition to fiscal and monetary policies which remain supportive of economic rebound, on-pace vaccination campaign will push &P500 index even higher.
