RELATED PARTY TRANSACTIONS. The Fund has deposit placements with EastWest Bank amounting to P14.84 million. The investment outlets were approved by the Board of Directors. All related party transactions are conducted on a best execution and arm's length basis.

OUTLOOK AND STRATEGY. Bond yields gained in August amidst the increase in the number of delta variant linked cases locally, and outlook downgrade from several research firms and credit rating agencies. A lower than expected July inflation rate of 4% also supported bond prices. The outlook continues to remain bleak amidst a surge in the delta variant cases. Given, the outlook we expect the central bank to remain accommodative to support the economy as the government imposes the Alert Level System nationwide. The Fund looks to invest in liquid fixed income securities and maintain portfolio duration within acceptable limits.

PROSPECTIVE INVESTMENTS. The Fund's prospective investments may include securities issued or guaranteed by the Philippine government, tradable securities issued by financial institutions or private corporations, marketable instruments and loans that are traded in an organized exchange, bank deposits, similar collective investment vehicles subject to existing BSP regulations, and such other investment outlets/categories the BSP allow.

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS. The Fund has deposits with EastWest Bank amounting to P34.09 million. These investment outlets were approved by the Board of Directors. Likewise, all related party transactions are conducted on best execution and arm’s length basis.

OUTLOOK AND STRATEGY. Monthly gains were moderated by the sharp decline on the last trading day of the month. The PSEI retreated to 7,200-level after the news about a new COVID-19 variant called Omicron emerged which exacerbated the MSCI Standard Index month-end rebalancing outflows. Uncertainty around Omicron variant will continue to haunt the stock market in the coming weeks. However, if proven that its effects are mild while existing vaccines provide sufficient protection against it, it will be taken as positive development which would allow the government to relax lockdown protocols further. The Fund will continue to track the performance of the Philippine Stock Exchange Index.

PROSPECTIVE INVESTMENT. The Fund’s prospective investments, depending on availability and market development, may include but are not limited to, stocks in the Philippine Stock Exchange Index, Time Deposits, Government Securities and tradable fixed income securities issued by local financial institutions or private corporations.

OUTLOOK AND STRATEGY. At month-end, the S&P500 index retreated below 4,600-level after US Fed Chair Jerome Powell said that Fed asset purchase tapering may come sooner-than-expected. Initially, the Fed announced that USD15Bn monthly reduction in asset purchases will end by June 2022. However, given Powell’s latest comment, the tapering may finish earlier. Although a lot remains unknown about the Omicron COVID-19 variant, the emergence of this new variant complicates the Fed’s predicament on the timing of policy rate normalization.
