OUTLOOK AND STRATEGY. The S&P 500 jumped 5.17% in February despite Federal Reserve Chair Jerome Powell effectively ruling out a rate cut in March. Corporate earnings in Q4 turned out to be better than expected, led by companies with links to artificial intelligence. Investors will be monitoring the next FOMC meeting on March 19-20 closely, especially if there are changes to the Fed's dot plot. We see US equities moving sideways in the near-term as investors look for catalysts post-Q4 earnings.

PROSPECTIVE INVESTMENT. The Fund's prospective investments, depending on availability and market development, may include but are not limited to, iShares Core S&P 500 ETF, Time Deposits, Government Securities and tradable fixed income securities issued by local financial institutions or private corporations. Investment in the iShares Core S&P 500 ETF may amount up to 100% of total assets but shall not fall below 90% of total assets of the Fund.

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS. The Fund's target fund (PhilEquity Fund, Inc.) has holdings of East West Banking Corporation common shares.

OUTLOOK AND STRATEGY Local equities rose for the fourth consecutive month in February despite elevated bond yields after inflation cooled to 2.8% in January, the lowest annual increase since October 2020. The rally in global equities continued to benefit the local market as foreign investors remained net buyers last month, which pushed the YTD net inflows to ~\$200 million. As expected, the Bangko Sentral ng Pilipinas kept its benchmark rate steady at 6.50%, but it lowered its 2024 inflation forecast from 4.2% to 3.9% as risks to its inflation outlook have receded. We expect equities to move sideways in March as investors look for catalysts beyond Q4 earnings. We see the PSEi at 7,250 by yearend.

PROSPECTIVE INVESTMENT. The Fund's prospective investments, depending on availability and market development, may include but are not limited to, PhilEquity Fund, Time Deposits, Government Securities and tradable fixed income securities issued by local financial institutions or private corporations. Investment in the PhilEquity Fund may amount up to 100% of total assets but shall not fall below 90% of total assets of the Fund.

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS. The Fund has a bond investment in Filinvest Land Corp amounting to P13.780 million. The investment outlets were approved by the Board of Directors. All related party transactions are conducted on a best execution and arm's length basis.

OUTLOOK AND STRATEGY. The local yield curve shifted higher across the curve MoM in February amid the uptick in the 10y US Treasury yield and the premium pricing of the new 5y Retail Treasury Bond (RTB), which fetched a coupon rate of 6.25%. The RTB coupon was higher than the 6.135% 5y BVAL rate the previous day. The Bureau of Treasury (BTr) raised a total of Php584.86 billion from the RTB offering, with 36% raised during the rate-setting auction and 64% during the public offer period. Since only Php243.45 billion was raised from the bond swap program, the market will remain awash with liquidity after the outstanding Php455.79 billion worth of RTBs mature in March. Federal Reserve Chair Jerome Powell's remarks on the unlikelihood of rate cuts in March sparked a selloff in US Treasuries in February, which pushed the 10y US Treasury yield to as high as 4.32%. We expect yields to move sideways while the market waits for clarity from the next Fed and BSP meetings, but any upticks in the local inflation print in the near term could push back expectations on the timing of rate cuts this year.

PROSPECTIVE INVESTMENTS. The Fund's prospective investments may include securities issued or guaranteed by the Philippine government, tradable securities issued by financial institutions or private corporations, marketable instruments and loans that are traded in an organized exchange, bank deposits, similar collective investment vehicles subject to existing BSP regulations, and such other investment outlets/categories the BSP allow.

OTHER DISCLOSURES

OUTLOOK AND STRATEGY. The local yield curve shifted higher across the curve MoM in February amid the uptick in the 10y US Treasury yield and the premium pricing of the new 5y Retail Treasury Bond (RTB), which fetched a coupon rate of 6.25%. The RTB coupon was higher than the 6.135% 5y BVAL rate the previous day. The Bureau of Treasury (BTr) raised a total of Php584.86 billion from the RTB offering, with 36% raised during the rate-setting auction and 64% during the public offer period. Since only Php243.45 billion was raised from the bond swap program, the market will remain awash with liquidity after the outstanding Php455.79 billion worth of RTBs mature in March. Federal Reserve Chair Jerome Powell's remarks on the unlikelihood of rate cuts in March sparked a selloff in US Treasuries in February, which pushed the 10y US Treasury yield to as high as 4.32%. We expect yields to move sideways while the market waits for clarity from the next Fed and BSP meetings, but any upticks in the local inflation print in the near term could push back expectations on the timing of rate cuts this year.

PROSPECTIVE INVESTMENTS. The Fund's prospective investments include securities issued by or guaranteed by the Philippine government, marketable fixed income securities issued by corporations and traded in an organized exchange, securities issued by or guaranteed by any government of a foreign country or any political subdivision of a foreign country,

securities issued by any supranational entity, loans traded in an organized exchange, savings and time deposits in any bank or financial institution, and other tradable investment outlets categories as the BSP may allow.

OTHER DISCLOSURES

OUTLOOK AND STRATEGY. Yields on ROPs, and Indons sovereigns increased MoM in February after Federal Reserve Chair Jerome Powell effectively ruled out a rate cut in March. Investors will be monitoring the next FOMC meeting on March 19-20 closely and will be on the lookout for any change in tone or language from the Fed. Any indication of a further pushback in rate cuts this year will likely spur a selloff in the EM bonds.
